Medical Assurance Society
KiwiSaver Plan

CASH PORTFOLIO

Fund Update for the year ending **31 March 2017**

This fund update was first made publicly available on
27 June 2017.

What is the purpose of this update?

This document tells you how the Medical Assurance Society KiwiSaver Plan Cash Portfolio has performed and what fees were charged. The document will help you to compare the fund with other funds. The trustees of the Medical Assurance Society KiwiSaver Plan prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Cash Portfolio invests in a range of cash assets. The fund has a very low level of volatility.

Total value of the fund	\$4,541,074
Number of Members in the fund	297
Date the fund started	22 Dec 2008

What are the risks of investing?

Risk indicator for the Cash Portfolio:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at mas.co.nz/savings-and-investment/risk-profiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

RETURN TYPE	AVERAGE OVER PAST 5 YEARS	PAST YEAR
Annual return (after deductions for charges and tax)	2.50%	1.79%
Annual return (after deductions for charges but before tax)	3.43%	2.49%
Market index annual return (reflects no deduction for charges and tax)	2.83%	2.18%

The market index comprises the benchmark index returns of each of the asset classes weighted by their benchmark asset allocations. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose

Returns since inception of the Cash Portfolio

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017. **Important:** this does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Cash Portfolio are charged fund charges. In the year to 31 March 2017 these were:

Total fund charges: % of net asset value	0.53%
---	--------------

Which are made up of:

Total management and administration charges	0.53%
--	--------------

Including:

Manager's basic fee	0.50%
Other management and administration charges	0.03%

Total performance-based fees	0.00%
-------------------------------------	--------------

Investors may also be charged individual action fees for specific actions or decisions (for example, for switching funds). See the PDS for more information about those fees. The annual manager's basic fee each member pays is subject to a minimum fee of \$50 per annum. Therefore for members with an account balance of less than \$10,000 the actual manager's basic fee charged as a percentage of the member's account balance may be higher than that stated in the Medical Assurance Society KiwiSaver Plan PDS.

Other charges	Dollar amount per investor or description of how charge is calculated
	\$0

Small differences in fees can have a big impact on your investment.

Example of how this applies to an investor

Alex had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Alex received a return after fund charges were deducted of \$179 (that is 1.79% of his initial \$10,000). Alex also paid \$0 in other charges. This gives Alex a total return after tax of \$179 for the year.

Medical Assurance Society
KiwiSaver Plan

DEFENSIVE PORTFOLIO

Fund Update for the year ending **31 March 2017**

This fund update was first made publicly available on
27 June 2017.

What is the purpose of this update?

This document tells you how the Medical Assurance Society KiwiSaver Plan Defensive Portfolio has performed and what fees were charged. The document will help you to compare the fund with other funds. The trustees of the Medical Assurance Society KiwiSaver Plan prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Defensive Portfolio invests mostly in assets with lower risks and returns, with some investment in growth assets that may give higher returns. The fund has a low level of volatility.

Total value of the fund	\$43,633,445
Number of Members in the fund	2,282
Date the fund started	01 Oct 2007

What are the risks of investing?

Risk indicator for the Defensive Portfolio:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at mas.co.nz/savings-and-investment/risk-profiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

RETURN TYPE	AVERAGE OVER PAST 5 YEARS	PAST YEAR
Annual return (after deductions for charges and tax)	5.24%	4.60%
Annual return (after deductions for charges but before tax)	6.58%	5.65%
Market index annual return (reflects no deduction for charges and tax)	6.23%	4.73%

The market index comprises the benchmark index returns of each of the asset classes weighted by their benchmark asset allocations. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose

Returns since inception of the Defensive Portfolio

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017. **Important:** this does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Defensive Portfolio are charged fund charges. In the year to 31 March 2017 these were:

Total fund charges: % of net asset value	1.21%
---	--------------

Which are made up of:

Total management and administration charges	1.21%
--	--------------

Including:

Manager's basic fee	1.00%
Other management and administration charges *†	0.21%
Total performance-based fees	0.00%

An estimate has been used to calculate certain underlying fund performance fees which are included in 'Other management and administration charges'.
*Please see the note at the end of the fund update.

Investors may also be charged individual action fees for specific actions or decisions (for example, for switching funds). See the PDS for more information about those fees. The annual manager's basic fee each member pays is subject to a minimum fee of \$50 per annum. Therefore for members with an account balance of less than \$5,000 the actual manager's basic fee charged as a percentage of the member's account balance may be higher than that stated in the Medical Assurance Society KiwiSaver Plan PDS.

Other charges	Dollar amount per investor or description of how charge is calculated
	\$0

†Note: Other management and administrative charges are set to reduce from September 2017. The reduction in fund charges is expected to be approximately 0.04%.
Small differences in fees can have a big impact on your investment over the long term.

Example of how this applies to an investor

Alex had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Alex received a return after fund charges were deducted of \$460 (that is 4.60% of his initial \$10,000). Alex also paid \$0 in other charges. This gives Alex a total return after tax of \$460 for the year.

Medical Assurance Society
KiwiSaver Plan

CONSERVATIVE PORTFOLIO

Fund Update for the year ending **31 March 2017**

This fund update was first made publicly available on 27 June 2017.

What is the purpose of this update?

This document tells you how the Medical Assurance Society KiwiSaver Plan Conservative Portfolio has performed and what fees were charged. The document will help you to compare the fund with other funds. The trustees of the Medical Assurance Society KiwiSaver Plan prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Conservative Portfolio invests mostly in assets with lower risks and returns, with moderate investment in growth assets that may give higher returns. The fund has a low level of volatility.

Total value of the fund	\$50,159,126
Number of Members in the fund	2,036
Date the fund started	01 Oct 2007

What are the risks of investing?

Risk indicator for the Conservative Portfolio:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at mas.co.nz/savings-and-investment/risk-profiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

RETURN TYPE	AVERAGE OVER PAST 5 YEARS	PAST YEAR
Annual return (after deductions for charges and tax)	6.50%	6.38%
Annual return (after deductions for charges but before tax)	7.77%	7.44%
Market index annual return (reflects no deduction for charges and tax)	7.22%	6.75%

The market index comprises the benchmark index returns of each of the asset classes weighted by their benchmark asset allocations. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose

Returns since inception of the Conservative Portfolio

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017. **Important:** this does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Conservative Portfolio are charged fund charges. In the year to 31 March 2017 these were:

Total fund charges: % of net asset value	1.27%
Which are made up of:	
Total management and administration charges	1.27%
Including:	
Manager's basic fee	1.00%
Other management and administration charges *†	0.27%
Total performance-based fees	0.00%
Other charges	Dollar amount per investor or description of how charge is calculated
	\$0

†Note: Other management and administrative charges are set to reduce from September 2017. The reduction in fund charges is expected to be approximately 0.11%.

Small differences in fees can have a big impact on your investment over the long term.

An estimate has been used to calculate certain underlying fund performance fees which are included in 'Other management and administration charges'.

*Please see the note at the end of the fund update.

Investors may also be charged individual action fees for specific actions or decisions (for example, for switching funds). See the PDS for more information about those fees. The annual manager's basic fee each member pays is subject to a minimum fee of \$50 per annum. Therefore for members with an account balance of less than \$5,000 the actual manager's basic fee charged as a percentage of the member's account balance may be higher than that stated in the Medical Assurance Society KiwiSaver Plan PDS.

Example of how this applies to an investor

Alex had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Alex received a return after fund charges were deducted of \$638 (that is 6.38% of his initial \$10,000). Alex also paid \$0 in other charges. This gives Alex a total return after tax of \$638 for the year.

Medical Assurance Society
KiwiSaver Plan

GROWTH PORTFOLIO

Fund Update for the year ending **31 March 2017**

This fund update was first made publicly available on 27 June 2017.

What is the purpose of this update?

This document tells you how the Medical Assurance Society KiwiSaver Plan Growth Portfolio has performed and what fees were charged. The document will help you to compare the fund with other funds. The trustees of the Medical Assurance Society KiwiSaver Plan prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Growth Portfolio invests mostly in growth assets with a higher level of risk and returns, and with some investment in income assets that provide a degree of stability. The fund has a moderate to high level of volatility.

Total value of the fund	\$163,295,658
Number of Members in the fund	6,217
Date the fund started	01 Oct 2007

What are the risks of investing?

Risk indicator for the Growth Portfolio:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at mas.co.nz/savings-and-investment/risk-profiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

RETURN TYPE	AVERAGE OVER PAST 5 YEARS	PAST YEAR
Annual return (after deductions for charges and tax)	9.32%	10.64%
Annual return (after deductions for charges but before tax)	10.39%	11.51%
Market index annual return (reflects no deduction for charges and tax)	9.59%	11.90%

The market index comprises the benchmark index returns of each of the asset classes weighted by their benchmark asset allocations. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose

Returns since inception of the Growth Portfolio

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017. **Important:** this does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Growth Portfolio are charged fund charges. Over the year to 31 March 2017 these were:

Total fund charges: % of net asset value	1.39%
---	--------------

Which are made up of:

Total management and administration charges	1.39%
--	--------------

Including:

Manager's basic fee	1.00%
---------------------	-------

Other management and administration charges ‡	0.39%
---	-------

Total performance-based fees	0.00%
-------------------------------------	--------------

Other charges	Dollar amount per investor or description of how charge is calculated
	\$0

An estimate has been used to calculate certain underlying fund performance fees which are included in 'Other management and administration charges'.

*Please see the note at the end of the fund update.

Investors may also be charged individual action fees for specific actions or decisions (for example, for switching funds). See the PDS for more information about those fees. The annual manager's basic fee each member pays is subject to a minimum fee of \$50 per annum. Therefore for members with an account balance of less than \$5,000 the actual manager's basic fee charged as a percentage of the member's account balance may be higher than that stated in the Medical Assurance Society KiwiSaver Plan PDS.

‡Note: Other management and administrative charges are set to reduce from September 2017. The reduction in fund charges is expected to be approximately 0.21%.

Small differences in fees can have a big impact on your investment over the long term.

Example of how this applies to an investor

Alex had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Alex received a return after fund charges were deducted of \$1,064 (that is 10.64% of his initial \$10,000). Alex also paid \$0 in other charges. This gives Alex a total return after tax of \$1,064 for the year.

What does the fund invest in?

ACTUAL INVESTMENT MIX

This shows the type of assets the portfolio invests in as at 31 March 2017.

TARGET INVESTMENT MIX

This shows the mix of assets the portfolio generally intends to invest in.

Cash and Cash Equivalents	2.0%

KiwiSaver Plan

AGGRESSIVE PORTFOLIO

Fund Update for the year ending **31 March 2017**

This fund update was first made publicly available on 27 June 2017.

What is the purpose of this update?

This document tells you how the Medical Assurance Society KiwiSaver Plan Aggressive Portfolio has performed and what fees were charged. The document will help you to compare the fund with other funds. The trustees of the Medical Assurance Society KiwiSaver Plan prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Aggressive Portfolio invests mostly in growth assets with a higher level of risks and returns, and with a small investment in income assets that provide a degree of stability. The fund has a moderate to high level of volatility.

Total value of the fund	\$58,376,587
Number of Members in the fund	3,152
Date the fund started	01 Oct 2007

What are the risks of investing?

Risk indicator for the Aggressive Portfolio:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at mas.co.nz/savings-and-investment/risk-profiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

RETURN TYPE	AVERAGE OVER PAST 5 YEARS	PAST YEAR
Annual return (after deductions for charges and tax)	10.07%	12.63%
Annual return (after deductions for charges but before tax)	11.06%	13.52%
Market index annual return (reflects no deduction for charges and tax)	10.06%	13.82%

The market index comprises the benchmark index returns of each of the asset classes weighted by their benchmark asset allocations. Additional information about the market index is available on the offer register at www.business.govt.nz/disclose

Returns since inception of the Aggressive Portfolio

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017. **Important:** this doesn't tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Aggressive Portfolio are charged fund charges. Over the year to 31 March 2017 these were:

Total fund charges: % of net asset value	1.42%
---	--------------

Which are made up of:

Total management and administration charges	1.42%
--	--------------
